

Wherever there's a show...

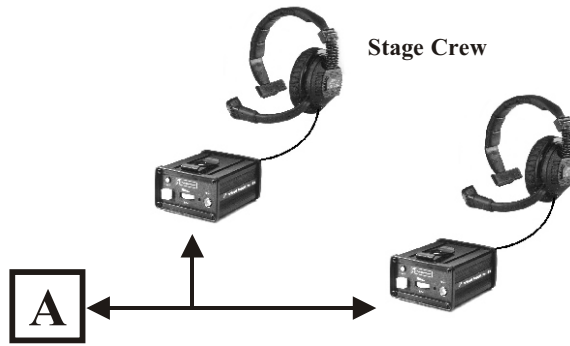

Portable System with Full Master Station

Applications Notes

Lighting Crew

Stage Crew

MS-200 Master Station with carry handle side panels

Stage Manager

In this system the Stage Manager is in communication with the Lighting Director and his Stage Crew on circuit A, and the both of the Audio positions on circuit B. The Lighting crew are on circuit Z, which only exists between the B side of the Lighting Director's 2-circuit belt pack (BP-2) and their BP-1 belt packs.

During rehearsals the Stage Manager can use the Link switch on this MS-200 to join circuits A and B together. Circuit Z remains isolated.

An RSM-1 could be substituted for the BP-2 if table-top or rack-mounting is desired.

The Stage Monitor Mix position has been equipped with a Blazon/2 which supplements the signal lamp on the belt pack with a bright flashing strobe light. It also has a buzzer which can be turned off.

The Stage Manager's MS-200 would be equipped with a headset, handset, or gooseneck microphone.
