

Wherever there's a show...

Basic Live Space System

Applications Notes

In this system the PS-2 in combination with a belt pack connected to circuit B acts as a master station. When the front panel A+B switch is pressed the Stage Left and Stage Right positions are connected to the Lighting Director. If the Lighting director presses the B+C switch with the A+B switch is Off, the LD will be connected to the Green Room. If the LD then presses the A+B switch, all stations will be connected. To prevent the green room from being accidentally connected, the B+C button can be made mo-
